

Community Investment Corp. Questions on ComEd Policy Proposals

June 2024

Question:	ComEd Response:
1. Is ComEd proposing to use the percentage of IE customers to calculate savings across both IE and non-IE zip codes or just non-IE zip codes?	ComEd is suggesting to use the percentage of IE customers to allocate Electrification savings across both IE and non-IE Zips.
2. Has ComEd estimated how much additional savings this could contribute to their IE Electrification savings goals if this change was adopted?	The policy presented is the same policy Guidehouse used in CY23. This is not a change, but a long-term adoption of an allocation policy. We have not analyzed the impact of this policy relative to another allocation policy.
